

ABOUT THE BOOK

This collection of scientific articles presents an interdisciplinary study of a new paradigm in education, as showcased during the 3rd International Scientific-Spiritual Practical Conference in Sonipat, India. The publication is the result of a collaboration between the International Scientific School of Universology (ISSU) and Rishihood University, bridging Western systemic rigor with the profound depth of Eastern philosophical traditions.

What is Inside?

The book introduces an innovative approach to education, viewing it as a tool for "healing consciousness" and discovering an individual's unique purpose. Based on the causal-systemic approach, the authors analyse a wide spectrum of topics:

- Modern Management: Implementing Universal Quality Management Systems (UQMS) in New Era organisations.
- Integral Pedagogy: Designing individual developmental trajectories and utilising energy-informational approaches in teaching.
- Forecasting and Modeling: The practical application of Astrosystemology in predicting social and personal trends.
- Destiny Design: The concept of "Dharma-design" and the modeling of life spaces based on the universal laws of nature.
- Sociosystemology: Visions of "Cities of the Sun" and the evolution of ancestral and social structures in the society of the future.

Target Audience

This publication is intended for:

- Researchers and Educators seeking new educational methods that transcend traditional frameworks.
- Managers and Leaders interested in ethical, effective, and systemic management.
- Therapists and Personal Development Coaches wishing to explore techniques for unlocking human potential (including element balancing and matrix diagnostics).
- Seekers of Knowledge dedicated to the idea of unifying science, spirituality, and culture.

This volume serves as a unique compendium on how to practically construct a Universal Scientific Worldview and implement an evolutionary program for human development in the 21st century.

ABOUT THE EDITORS

Vitaliy A. Polyakov is the founder and Head of the International School of Universology, Honorary Doctor of Lviv Stavropigion University, and a full member of the International Scientific Academy of Ecology and Life Safety (Saint Petersburg, Russia). He is the author of over 100 monographs in philosophy, management, psychology, forecasting, world culture, and health prevention. Polyakov developed Universology as an interdisciplinary methodology based on causal and systemic approaches, integrating philosophy, modern science, world culture, and historical traditions to reveal universal laws of nature, life, and society.

Tatiana Chojnacka is a member of the International Scientific School of Universology from 1997. In 2007 she has defended dissertation and has got the scientific degree - Ph.D. in International Relations. Her main fields of interest are Universal management, continuing education and public self-management. Since 2004 she has performing the duties of Vice president of Polish Academy of Universal Management, later - director of International Institute of Universology. She is the author of books and articles on Universal System of Management Quality, consulting enterprises in implementing the newest generation of quality systems.

Maryna A. Kolesnyk has been a member of the International Scientific School of Universology since 2006. She is a Doctor of Pedagogical Sciences and Associate Professor at the Department of Biology, T.H. Shevchenko Chernihiv Collegium National University. She graduated in Chemistry and Biology in 1997 and has more than 25 years of teaching experience in higher education. She obtained her Ph.D. in Pedagogy in 2003 and her Doctoral degree in 2021. She coordinates the continuous education system of the International Scientific School of Universology. Her research interests include interdisciplinary education, the formation of a universal scientific worldview, and energy-information pedagogy.
